

SmartStart

Guaranteeing a correct set up every time.

SmartStart enables a new Inverter to be downloaded with all the required parameters from another similarly programmed drive, a customer who has multiple drives of the same size can program one then copy the parameters to all the other drives; piece of mind can be given to customers unsure of how to set up an Inverter guaranteeing correct set up.

- Easy to use
- Removes hassle
- Gives piece of mind

For fast and accurate repeat drive programming simply insert the new SmartStart, pictured, into the RJ45 slot on the face of the Eltadrive.

- Upload/download buttons allow for fast copying of parameters between drives.
- Plug in, or use the Bluetooth capability for wireless convenience, to copy parameter sets between drives.
